

MATH REVIEW: Prepare for MATH 20

Math 20 requires Math 10 knowledge as a prerequisite. Here are two resources to help you prepare.

Option 1:

MyOpenMath

MyOpenMath has free help to prepare for Math 20

MyOpenMath is a free resource, but it is not as robust as the Aleks program.

It also requires you to work through each topic without identifying your weaker areas.

Go to [MyOpenMath.com](https://www.myopenmath.com) and register as a **NEW STUDENT**.

You will be asked to enter your information to begin a class. CCC offers several classes using MyOpenMath, so with this login information you will already have an account if you have a future class that uses MyOpenMath.

The Enroll Key: **Math 20 CCC** › Course ID: **22151**

Option 2:

Use the Aleks assessment and learning system

**Spending \$40 now could save repeating a \$450 class*

Aleks is an online program that guides you through the areas of math you need to review. It determines your problem areas and allows you to work on them. Aleks has multiple resources that will help you review your math skills and prepare for Math 20. You can view solutions to sample problems and continue practicing until you feel you have mastered a topic. There is a **FREE TRIAL** available. Go to www.aleks.com to check out this resource.

After creating an account and purchasing a student access code, use the Class Code: **3NUML-DXYFL**

The class name is: **Prep for Math 20**

You will have six weeks to review all your math skills necessary to be successful in MTH 20.

Please use either of these resources to review the basic math skills needed to be successful in Math 20 at CCC.

If you have any questions, contact:

Cathy Warner at cswarner@clackamas.edu

OR Advising at advising@clackamas.edu

OR a PASS advisor at pass@clackamas.edu

MATH REVIEW: Prepare for MATH 50, 60 & 98

Math 50, 60 and **98** each require Math 20 knowledge as a prerequisite. Here are two resources to help you prepare.

Option 1:

MyOpenMath

MyOpenMath has free help to prepare for Math 50, 60 and 98

MyOpenMath is a free resource, but it is not as robust as the Aleks program.

It also requires you to work through each topic without identifying your weaker areas.

Go to [MyOpenMath.com](https://www.myopenmath.com) and register as a **NEW STUDENT**.

You will be asked to enter your information to begin a class. CCC offers several classes using MyOpenMath, so with this login information you will already have an account if you have a future class that uses MyOpenMath.

The Enroll Key: **Math 50, 60 or 98** > Course ID: **23991**

Option 2:

ALEKS®

Use the Aleks assessment and learning system

**Spending \$40 now could save repeating a \$450 class*

Aleks is an online program that guides you through the areas of math you need to review. It determines your problem areas and allows you to work on them. Aleks has multiple resources that will help you review your math skills and prepare for Math 20.
