

Continuing Education for Environmental Professionals

SPONSORSHIP PROGRAM

The **Environmental Learning Center** (ELC) offers a variety of trainings designed to support the continuing education needs of professionals who work in positions connected with environmental health. Several trainings are offered each year on topics that have been determined to be in-demand, with a focus on providing hands-on field experience whenever possible.

Become a sponsor and help students soar higher. Sponsorship dollars provide a means for offering reduced pricing for college students and others who lack the ability to pay full price, as well as to support the career development of individuals who identify as a person of color.
